Engaging fans.

Repeatedly.

Team Vitality has launched V.HIVE. A free app in which its digital community can create an avatar, engage in mini-games and post predictions for the club.

The results reach a leaderboard, in which the top contenders win valuable prices, including meetings with their favorite pro players.
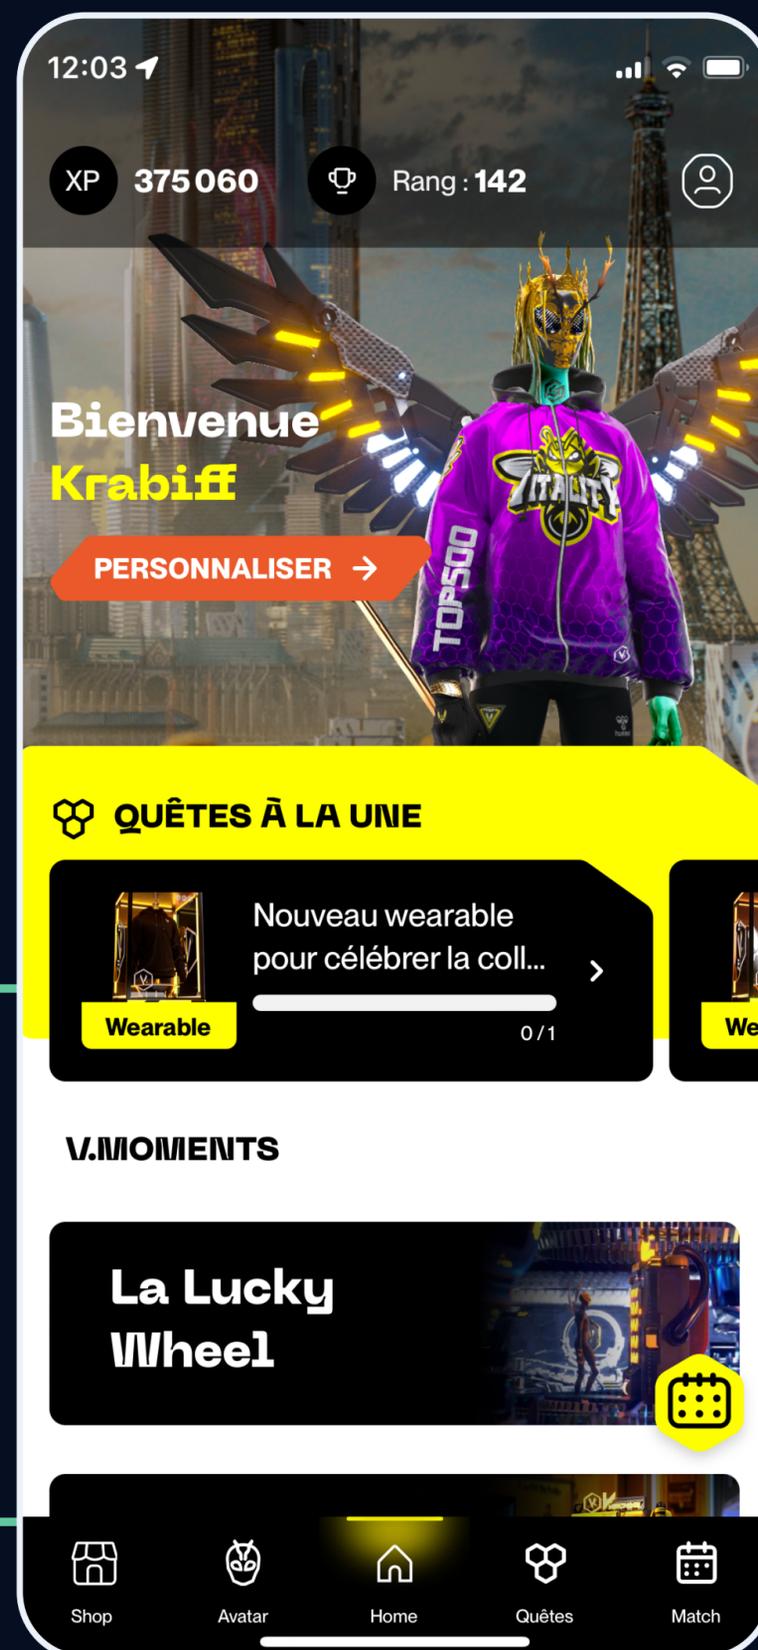

Predictions & pick-ems.

Team Vitality uses Abios to fuel predictions with accurate and timely data.

By utilising data points such as match up, team name, dates and tournaments, Team Vitality has created an easy and fun pick-em game allowing fans to guess what matches the team will win.
